

Application and Information

We offer a four-week training programme in the field of geospatial technologies. Its participants will be qualified to work with and know about the latest advances in geospatial technologies and their application for environmental and remote sensing data analysis, as well as learn about teaching and learning with geoinformation in higher education.

The application process for the GeoTraining 2020 summer school is closed. All selected participants are informed by an invitation letter on July 16th, 2020.

You will find all important information on application requirements, procedures and general circumstances in the sidebar.

If you have further questions, please contact us: questions@geotraining.geodu.org

Due to the worldwide Covid-19 pandemic there will be no GeoTraining summer school locally running at Goethe-University Frankfurt in 2020. This decision was made in line with the DAAD programme coordinator. All invited scholarship holders will be individually informed how to join our GeoTraining online learning course environment for 2020.
