2019: Results Project Work 1

These are the results of the GeoTraining 2019 project work on geospatial technologies:

- Correlation between terrain characteristics (elevation, aspect, slope) and land cover classes of Fogo Island
- Variation between species composition and major land covers
- Introduced species among different land covers in Fogo island
- Do Introduced Species Predominantly Occur in Close Vicinity to Settlements (and, Vice Versa, More Endemic Species in Remote Areas)?
